

ABSOLUTE ROBOTICS

Who We Are

Absolute Robotics is a robotics team based at the Woodlands Secondary School in Mississauga, Ontario.

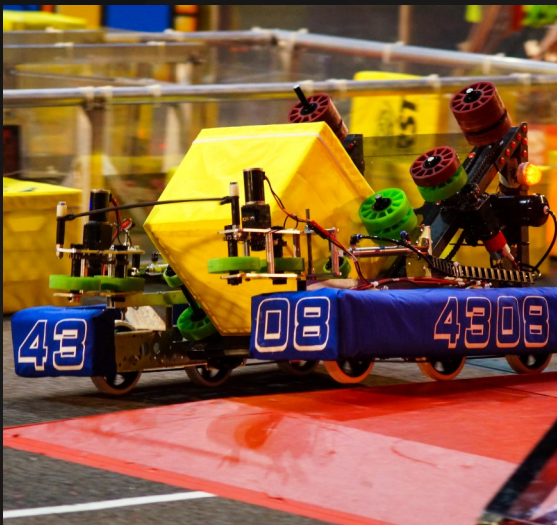

We are currently made up of over 70 students, teachers, and mentors who are passionate about entrepreneurship, business, engineering, and technology!

What We Do

Absolute Robotics competes in the annual FIRST Robotics Competition (FRC), an international competition where teams design and build an industrial-sized robot within 6 weeks to participate in an engineering challenge. Teams compete with robots in their local and international community at competitions around the world, predominantly in Ontario and the US.

Our members gain invaluable hands-on experiences in the world of engineering, problem solving and business. Through FRC, they develop key skills and competences that are crucial in our constantly evolving technological society.

FRC 2019 At A Glance

3,800 teams

95,000+ members from over 90 Countries

70,000+ spectators at FIRST Championships

Our Recent Achievements

The past competition seasons have been incredible for us, with us achieving:

2018 McMaster District Event Finalists

2018 Ontario District Championship Division Finalists

2018 Detroit World Championship Division Semi-Finalists

2019 STEMley Cup Championship Winners

Why Sponsor Us?

Our Vision

Absolute Robotics strives to promote STEM within the community by creating a positive learning environment where students can pursue their passion for STEM and develop their skills in engineering, programming, design, and business.

Our Goal

Absolute Robotics wants to continue being able to provide the opportunity for our community to experience what it is like to be a part of a world-class robotics team. Through lessons from senior members and mentors, engagement in the design and building of complex mechatronic systems, and participation in exciting competitions, we want to give them skills and experiences that they wouldn't get anywhere else.

Exposure and Outreach

Absolute Robotics has wide reach in both its local and global community. At each regional competition alone, Absolute Robotics interacts with several supporting business and organizations, dozens of local robotics teams, and hundreds of fellow high school students, mentors, and industry professionals.

How Can I Help?

There are countless ways that you can give us a hand! The operation of an FRC robotics team is a costly endeavor, so financial sponsorships would go a long way towards helping us achieving our goals. Non-monetary sponsorships would be also greatly appreciated as well! This might include supplying raw materials like sheet metal or wood, providing key robot parts like electronics or pneumatics, machining or printing services, or catering for an event.

Where Does Your Investment Go?

Any resources that you help provide will be directly used to help support the various activities that we do! Our funds will be spent on many needs, including the following:

- Competition registration
- Robot parts and machining
- Tools and equipment
- Team clothing and branding

Additionally, any extra money raised will go towards helping decreasing member registration costs, making what we do more accessible to everyone and reducing the individual financial burdens on members.

Sponsorship Tiers

In exchange for your sponsorship (both monetary and non-monetary), we are offering a variety of benefits based on the following tier levels:

	Bronze \$250-\$499	Silver \$500-1499	Gold \$1500-\$2499	Platinum \$2500+
